Availability Update for Select Sterile Injectable Controlled Substance Products

Dear Customer,

Pfizer is committed to providing timely supply information so that you can plan for patient care. As such, we want to notify you that we are anticipating additional supply interruptions and potential stock outs for select Pfizer Hospital Schedule-II controlled substance injectable products, outlined in the Appendix of this letter.

These anticipated additional supply interruptions have emerged due to recent changes described in the U.S Drug Enforcement Administration's (DEA) 2024 Annual Aggregate Quotas and Assessment of Annual Needs Final Order, which included regulatory changes in the administration of individual procurement quotas. These changes were implemented in January 2024 and have impacted Pfizer and our API suppliers' ability to secure necessary quotas to support historical production levels of our controlled substance sterile injectable products.

The U.S. Food and Drug Administration (FDA) and DEA have been notified, and Pfizer will continue to work collaboratively to address this challenge as soon as possible. To help ensure equitable distribution of inventory, we will release at historical demand levels to wholesalers and distributors, on a weekly basis, as possible, depending on inventory levels and Product Status.

Please recognize that this is a dynamic situation, and these Estimated Delivery Dates and Product Status may change, so we encourage you to check our [Availability Report](#), updated weekly and accessible on the PfizerHospitalUS.com homepage, for the latest information. Pfizer will also continue to provide customers with timely updates on the availability of these products as needed.

For product availability questions, please reach out to your Pfizer Hospital sales representative or account executive. Alternatively, the Supply Continuity Team can be contacted between 7am and 5pm CT at 1-844-646-4398 (select option 1 [Customer], then option 3 [Supply Continuity Team]).

Thank you,
